Baby Naming & Welcoming

The Spiritual Humanist is an organization dedicated to providing the holistic and spiritual benefits of religions to non-religious people. These generally include the rites, rituals, and practices that religions naturally bring to a family through thousands of years of traditions. Humanist (Secular, Atheist, Freethinker, Skeptic, Bright, etc.) families have to account for the spiritual aspects that don't as naturally occur in their lives.

One set of these are the rites that are frequently performed in a religious setting and that mark the natural movement through life. Rites like birth, marriage, and divorce...
